

CS4076 - Project - Detective Game

Culprit - Powerful woman murderer -

Murder - she killed the victim accidentally. She had no intention of killing the victim, but was backed into a corner, she wanted revenge, she didn't want him dead. All a big accident or is it

Our culprit only wanted what was rightfully hers, her brother, did not deserve it. Her parent had forgone, leaving the property in her name. Step mother inheritance; Sudden death, evil stepmother splits all the deeds between herself and her son, leaving her nothing of her birth right. Step mother wrote the will, Father was so close to death, all he could was sign the document.

Suspects - lover, family, ex-lovers, close friends; the victims may have killed each other it seems, gang ties

Victim - step-mother that wronged her

All signs point to the step mother and son kill each other, they didn't want to share the deeds, they intended to dispose of one another,

Flower shop inheritance - night shade/ Gelsium for the poison

One of the family members has a health condition that requires Gelsemium, but our culprit increases the dosage of the drugs, poisoning the victim

Autopsy reveals poisons in both of the victims, slow acting, blunt force trauma killed one, and the other succumbed to the paralysis of the poison.

Clues - signs of struggle, DNA samples, minor pieces of evidence, blood stains, medication bottles, blunt force weapon, flowers the culprit grows at her shop, autopsy results

Map of the rooms/levels

Levels - 1st level: arrive on the crime scene, see the corpse and gather some evidence

2nd level: next day, go back to the crime scene without the corpse this time and gather more evidence

3rd level: interviewing suspects
